

Senior Electrical Engineer with PLC experience (m/f/d)

Your tasks:

- Creating and optimizing the automation of enamelled wire machines
- Responsible for design-related adaptations of the machine's electrical equipment
- Supporting commissioning of enamelled wire machines
- Enhancing control processes
- Supporting service activities for customers
- Updating MAG machines
- Processing of construction and development projects
- Supporting in-house prototype tests

You offer:

- Completed technical education in the field of electrical engineering, automation technology, drive technology, control engineering, mechatronics, or similar (HTL, FH, technical university with bachelor or master degree, ...)
- Several years of relevant professional experience
- Knowledge of automation systems (preferably Rockwell, Allen Bradley, Siemens, Codesys, etc.)
- Profound knowledge in MS-Office
- Good command of written and spoken German and English (other foreign languages would be an advantage)
- Independent and self-reliant way of working
- Analytical, creative, problem-solving and goal-oriented thinking and acting
- Flexibility and a high sense of responsibility
- Strong communication and cooperation skills
- Team spirit, sociability and open manner

We offer:

- Varied field of activity in a globally recognized international company with a family environment
- Future pension plan on top of the agreed salary
- Employee bonus program
- High degree of flexible working hours within our organization
- High degree of willingness to promote personal and professional development
- Wide range of social benefits (regular company events, social room, team-wear, fruit, etc.)

Your gross monthly salary for this position is at least € 4.000,- on a full-time basis, whereby we will agree on your actual salary with the willingness to overpay according to your qualifications and experience.
